ODNR Expedited Permits**SOOGA Members,**

As you might be aware, permitting activity has significantly increased over the past several months.

In order to meet our statutory timeframe obligations for issuing permits, the chief has decided not to accept any requests for expedited permits effective Friday, December 10th at 5 pm. Any requests for expedited permits received after December 10th at 5 pm will be returned.

2021 Joint Tax Webinar

Our November 17th, 2021 Oil and Natural Gas Accounting and Tax Seminar co-sponsored by GO-WV, PIOGA and SOOGA was a success.. We had around 70 attendees registered for the one day webinar presented by Baker Tilly US LLP (formally Arnett Cabis Toothman, LLP) that covered tax and accounting issues effecting West Virginia, Ohio and Pennsylvania.

Thanks to all the ACT presenters; Bill, Charlene, Chad, Jonathan and Benjamin. Also a big Thank You to Lori, Deana, Katie and Janet for all their help.

**MERRY CHRISTMAS AND
A HAPPY NEW YEAR FROM
OUR FAMILY TO YOURS!**

THE CROW'S NEST

It is hard to believe how fast another year has passed by. As 2021 comes to a close I would like to reflect on everything we have accomplished this year. Although it was not the full return to normal that we all had hoped for, I am thankful we were able to hold some of our events. There have been some obstacles for our industry this year, but also many positives. Prices have climbed since the beginning of the year and seem to be holding relatively steady. I'm optimistic this trend will continue throughout 2022.

Our joint tax seminar presented by Baker Tilly held on November 17th was well attended. We had 74 attendees between all three organizations. I hope everyone who attended was able to use some of the new information to help within their businesses. As always, our November Gun Raffle was a huge success. I would like to thank everyone for their participation.

As you will see later in the issue, the SOOGA Board of Trustees approved a slight increase in membership dues. Unfortunately, prices everywhere have gone up and we were unable to avoid this needed increase. In other news, more discussion regarding the Methane Tax has caught traction. We are monitoring the situation and working alongside other industry organizations to combat this proposed tax. We will do our best to keep you updated with the latest information.

I also wanted to briefly mention that the ODNR has paused the expediting of permits. Any permits filed with ODNR after December 10th, 2021 can no longer be expedited. We are unsure of how long this temporary pause will last.

As we look forward into 2022, we are finalizing our schedule and hope to be able to hold all our annual events. The board has also discussed potentially implementing some new ideas, as well as expanding upon some current events. It is our goal to give back to our members, without you these events would not be possible.

I want to wish everyone a Merry Christmas and a Happy and Prosperous New Year!

Stand Tall, Stand United and Keep Pushing Forward!

Jared Stevens,

President

Total	3,564	3,623	-59	-59	3,939	9.5	3,650	-2.4

Summary

Working gas in storage was 3,564 Bcf as of Friday, November 26, 2021, according to EIA estimates. This represents a net decrease of 59 Bcf from the previous week. Stocks were 375 Bcf less than last year at this time and 86 Bcf below the five-year average of 3,650 Bcf. At 3,564 Bcf, total working gas is within the five-year historical range.

Prices/Supply/Demand

Prices in the Northeast fall as a result of warmer weather moving into the region yesterday. At the Algonquin Citygate, which serves Boston-area consumers, the price went down \$1.96 from \$6.89/MMBtu last Wednesday to \$4.93/MMBtu yesterday. Prices at Algonquin Citygate rose as high as \$8.33/MMBtu on Monday and remained elevated on Tuesday at \$7.86/MMBtu as a result of significant fluctuations in temperatures and the resulting impact on residential and commercial sector demand. Temperatures in Boston fell over the Thanksgiving weekend, averaging approximately 7°F below normal Saturday and Sunday, and remained below normal through Tuesday. Yesterday, however, temperatures returned to normal and are expected to remain in the normal to above-normal range through at least the middle of the month.

At the Transcontinental Pipeline Zone 6 trading point for New York City, the price decreased \$1.38 from \$5.26/MMBtu last Wednesday to \$3.88/MMBtu yesterday. Prices in the New York City area also rose on Monday and Tuesday to \$5.71/MMBtu and \$4.39/MMBtu, respectively, as a result of below-normal temperatures, which receded yesterday. Temperatures in New York City’s Central Park averaged 36°F on Tuesday, more than 7°F below normal, but averaged above 44°F yesterday, approximately 1°F above normal.

(continued page 6)

(continued from page 5)

Price declines in the Appalachia production region mirror price declines in the Midwest and Gulf Coast. The Tennessee Zone 4 Marcellus spot price decreased 86 cents from \$4.48/MMBtu last Wednesday to \$3.62/MMBtu yesterday. The price at Eastern Gas South in southwest Pennsylvania fell 91 cents from \$4.56/MMBtu last Wednesday to \$3.65/MMBtu yesterday.

U.S. supply of natural gas increases week over week. According to data from IHS Markit, the average total supply of natural gas rose to 101.4 Bcf/d, an increase of 1.0% (1.1 Bcf/d) compared with the previous report week. Dry natural gas production grew by 0.9% (0.9 Bcf/d) to 96.0 Bcf/d compared with the previous report week's average of 95.1 Bcf/d. Average net imports from Canada rose 3.3% from last week to 5.3 Bcf/d. Compared with the same period a year ago, total supply this report week is up 5.2%.

U.S. natural gas consumption increases week over week in all sectors, except the power sector, and exports increase from a week ago. Total U.S. demand of natural gas increased by 0.8% (0.8 Bcf/d) compared with the previous report week, according to data from IHS Markit. NOAA reports warmer than average temperatures across the Central and Western U.S. with some nighttime temperatures dipping below freezing across much of the United States. Industrial sector consumption increased by 0.5% (0.1 Bcf/d) week over week, and natural gas consumed for power generation declined by 3.6% (1.0 Bcf/d) in the same period. Natural gas exports to Mexico increased 3.6% (0.2 Bcf/d). Natural gas deliveries to U.S. LNG export facilities (LNG pipeline receipts) averaged 12.0 Bcf/d, or 0.3 Bcf/d higher than last week. LNG feed gas reached a record high of 12.4 Bcf/d on November 26.

U.S. LNG exports were unchanged this week from last week. Twenty-three LNG vessels (eight from Sabine Pass, five from Freeport, four from Corpus Christi, three from Cameron, two from Cove Point, and one from Elba Island) with a combined LNG-carrying capacity of 84 Bcf departed the United States between November 25 and December 1, 2021, according to shipping data provided by Bloomberg Finance, L.P.

The ODNR quarterly report list horizontal shale wells, 2,753 of which reported oil and natural gas production during the first quarter of 2021.

There are currently 3,428 Utica Permits, and 2,914 Utica shale wells drilled.

There was a total of 548,140,794 Bcf produced in the first quarter of 2021.

As of December 4, the national Baker Hughes total rig count increased to 569.

Premium Service for a Premium Product

Whether buying or transporting crude, Ergon Oil Purchasing offers flexible logistics to move your product from wellhead to market. Through Ergon's refineries, network of terminals, barge and trucking fleets, we understand what drives the crude oil industry.

Ergon Oil Purchasing, Inc.

Call 1-800-278-3364 to learn more.
eopsales@ergon.com

Today there are over 6,000 products refined from Natural Gas and Crude Oil.

Stow, Ohio family. Photo courtesy of National Geographic.

Plastics

Plastics come in a large variety from sporting equipment, storage containers, toys, toothbrushes, artificial hearts to everyday household products.

Synthetic Fabrics

Nylon, Orlon, Dacron and Dynel are all made from petroleum. Parachutes, carpets, rope and Astro-Turf are made from these synthetic fabrics.

Synthetic Rubber

Synthetic rubber was developed during World War II. Today, we find it in gloves, tennis shoes, boots, tires, swimming floats, hoses, stoppers, rubber bands, belts, skate wheels, shoe heels and balloons.

Carbon Black

Carbon Black is used in paints, inks, rubber, cement, batteries, televisions, radios and computers.

Medicines

Medicines such as aspirin, antihistamines, Vaseline, alcohol, ammonia, antibiotics and antiseptics all contain petrochemicals.

Waxes

Waxes are used to make waxed paper, candy, gum, candles, crayons and soap.

Cosmetics

Soap, cleansing creams, toothpaste, shampoo, hair spray, lotion, cologne, baby oil, lipstick, lip balm, nail polish, hand cream, shaving cream and suntan lotion among others all come from crude oil!

Natural Gas and Propane

Nearly 7 out of every 10 homes are heated with natural gas. We also use it to cook food, dry clothes and heat water. Businesses use it in many ways, from cooking to fueling high temperature blast furnaces.

Fuels

Gasoline, jet fuel, kerosene and other products help fuel automobiles, trucks, motorcycles, airplanes, golf carts, lawn mowers and edgers.

Which of these products do you use everyday?

Fact: The average U.S. citizen uses 3 gallons of these refined petroleum products each day!

SUPPORT THE FUTURE LEADERS AND WORKERS OF OHIO'S NATURAL GAS AND OIL INDUSTRY

In 2007, the Ohio Oil and Gas Energy Education Program (OOGEEP) created a Foundation primarily to provide continued educational opportunities throughout Ohio. Over the years, the Foundation has placed a special emphasis on awarding scholarships to qualified students with career goals in the natural gas and oil industry. The very first year, the Scholarship Committee was thrilled to be able to award 7 scholarships to bright and deserving students. As the Foundation has grown, it has been fortunate enough to financially support the dreams of more than 530 students.

Your generosity has allowed these young men and women to achieve their career goals in our industry and has helped build the next generation who will explore, develop, and produce the essential energy resources that fuel our lives.

To sustain the future of the industry, we are asking for your help to fulfill our mission. [Can you make a tax-deductible donation to help us meet our end of year finance goal?](#)

THANK YOU – This would not have been possible without YOU.

Foundation Scholarship recipients are some of the most talented and brightest students in the country. Recipients are well vetted through a vigorous process by our Scholarship Committee in order to ensure that they possess the desire and credentials to obtain an education that will support a fulfilling career in the natural gas and oil industry for years to come. Applicants are judged by our committee on career choice, essay, academic achievements, letters of recommendation, and many other special recognitions.

In order to ensure that the future of the natural gas and oil industry has qualified leaders and workers for generations to come, we kindly ask you to consider making a [tax-deductible donation](#).

- DONATION OPTIONS -

Please consider a tax deductible donation of \$100, \$250, \$500 or a full scholarship of \$1,000 to sustain the future of the natural gas and oil industry.

[NEW! You can now quickly, securely and easily donate online via PayPal!](#)

As always, you can also donate by sending a check.

Congress Considering a Major increase in OSHA Penalties

Early last month a Congressional committee approved an increase in maximum fines for OSHA penalties as part of the “Build Back Better Agenda”. Increasing the \$9,753 minimum today to a massive \$50,000. For Serious violations the increase would cause the maximum to increase from \$13,653 to \$70,000. Under the proposed changes the maximum penalty per violation could be as much as \$700,000. Five times the penalty amount right now. Provisions in the “Protecting America’s Workers Act” would also be increased due to this change. This act has not been enacted yet but is being voted on by both the House and possibly the Senate soon. The last major penalty increase Congress approved maximum penalties for “serious” violations from \$7,000 to \$12,471 and “willful” and “repeated” violations from \$70,000 to \$124,709 in June of 2016, an increase of 78%. There was increased strain to agency resources as well as creating a major increase in cases being contested. The current maximum penalty for serious violations is \$13,653 which now automatically adjust annually according to the Consumer Price Index

A single violation under the proposed rules could put companies out of business. As a result, challenges by cited employers will increase like what was experienced in 2006 when Congress increased penalties under MSHA. In 2010, penalty increases for OSHA violations showed an increase of 60% in workload for administrative law judges. This is due to the fact fewer cases were settled early and moved on to hearings.

NOTICE OF 2022 DUES INCREASE

Being the Membership Chairman and a part of SOOGA as a Trustee for over 20 years, I have been tasked with the duty to inform our Membership of much needed dues increases in order to maintain the Organization.

During my Tenure with SOOGA, I cannot remember there ever being an increase in dues. We have always managed to provide value and timely information without having members pay excessive prices for our membership activities.

On November 10, 2021 the Southeastern Ohio Oil and Gas Association Board of Trustees moved to raise Membership dues moderately.

They are as Follows:

\$200 per year: Producers, Contractors, Allied Industries & Professionals

\$125 per year: Associates (additional employees of companies)

\$100 per year: Royalty Owners/Non-Operating Investor

\$50 per year: Students

The 2022 Advertising packages which include a membership will reflect the increase in membership dues only, but will remain unchanged otherwise.

In speaking for the Trustees of the Southeastern Ohio Oil and Gas Association we would appreciate your understanding of this increase and certainly hope this causes no hardship.

Thank you,
Steven Sigler
SOOGA Membership Chairman

SOOGA's Energy Insights

Hosted by Johnny Wharff
Saturdays @ 9 A.M.

This program on the radio is brought to you by the Southeastern Ohio Oil and Gas Association and can be heard every Saturday at 9 A.M. Listen to the program on any of these five stations:

Previous episodes can be found on SOOGA.org or by searching for Energy Insights WMOA on YouTube.

SOOGA's Energy Insights recently traveled to Washington DC to get a perspective of the industry on a federal level. Please listen to episodes from members of the Energy and Commerce Committee as well as the person in charge of the Environmental Protection Agency (EPA) Administrator Andrew Wheeler.
